

Stem Cell Assurance and Traxxec Inc (TRXX.PK), launches Premier Services in South Florida

Stem Cell Assurance Inc., (SCA) organized in the State of Florida, is one of the nation's first companies solely established to make available a comprehensive set of Adult Stem Cell services to consumers. SCA today launches in Florida with Dr. Leonard Haimes at The Haimes Centre Clinic, 7300 N. Federal Highway, Suite 100, Boca Raton, Florida 33487. This service will provide genetic profiling services and consultations, adult stem cell therapies, adult stem cell research as well as stem cell collection, storage services and cosmetic products. SCA is strategically positioned to enhance the scope of services available to consumers for collection, processing, cryopreservation and storage system. Stem Cell Assurance is located in Boca Raton, Florida.

Why Bank Your Stem Cells Today?

The urgent need to bank stem cells for your family and yourself is based on the lack of adequate public source of healthy and safe adult or cord blood stem cells. Today, public cell banks can fulfill less than 5% of the therapeutic demand if we all were to receive at least one treatment in our lives. Waiting lists can be long. For some minorities, cells are rarely available.

About Stem Cell Assurance

Stem Cell Assurance, a science based adult stem cell company, provides its clients with private stem collection and preservation services worldwide. The company specializes in collecting, testing, and banking an individual's own healthy adult stem cells from the peripheral blood of children and adults from the cord blood of healthy new born infants. These stem cells will serve as the basis for emerging personalized immunological and regenerative therapies. It is very important to note that Stem Cell Assurance is not involved in the use of embryonic stem cells. Stem Cell Assurance works to ensure that the client's adult stem cells will always be available for future use in sustaining life and battling disease. The company is headquartered in Boca Raton, Florida. For more information about Stem Cell Assurance, please visit our website at www.Stemcellassurance.com.

Dr. Haimes said "With this technology we are prepared to guard in the future in helping ourselves and our families against the development and be prepared to treat illnesses at that time."
